PREMIUM COMPOSITE PANELS

12 YEARS WARRANTY

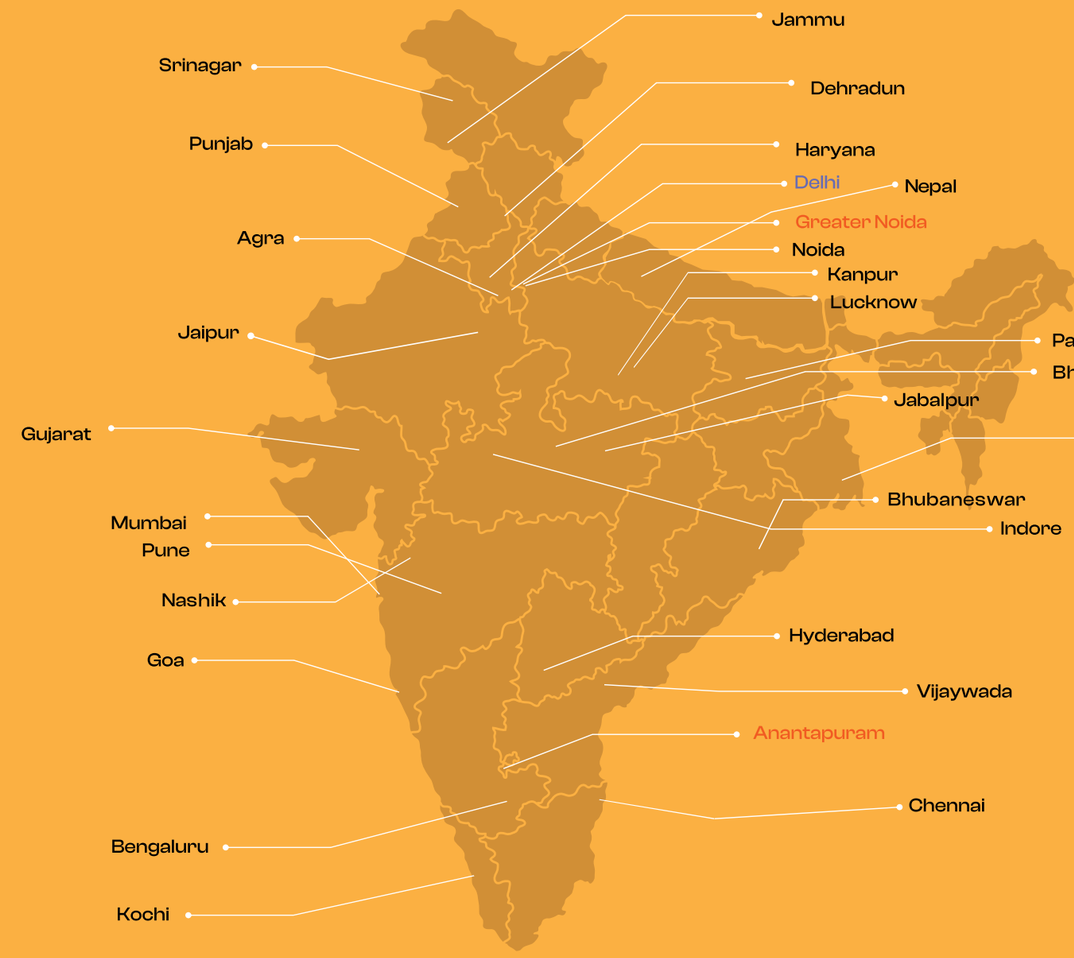

About Us

Founded in 2014, Alutech Industries began operations in July 2015 with a single production line at a one-acre facility. As of 2026, the company has grown to operate two manufacturing locations with four production lines, including 5-feet production capability, spread across a total area of 6.5 acres marking a strong journey of growth and excellence.

From these humble beginnings, Alutech has evolved into one of India's most trusted Brand for ACP, HPL, Clads, and HDMR MDF, known for its commitment to quality and continuous innovation.

Today, Alutech stands as a symbol of growth and reliability, offering 150+ ACP shades in 2025, along with a diverse range of surface solutions that meet modern architectural demands.

With a strong and rapidly expanding dealer network across the country, the company has built a reputation for delivering excellence through precision manufacturing, dependable service, and industry-leading standards.

CORPORATE PRINCIPLES

VISION

One Panel One Nation with a global vision, Alutech speaks every language through innovation.

Our 3D Vision transforms projects of all sizes, turning dreams into reality. We bring strength, beauty, and excellence to every creation, from homes to skyscrapers.

Building a future without limits – with Alutech!

MISSION

At Alutech, we stay ahead of market trends, crafting durable products that blend modern techniques with artistic appeal. Committed to impeccable service, we deliver high-quality solutions that exceed expectations. By offering a wide range of innovative, value-driven products, we build lasting relationships and strengthen our brand as a trusted name in architectural excellence.

OUR BRAND VALUES

Save Earth – We manufacture 100% recyclable ACP using recycled plastics from paddy and wheat fields and reusable aluminium, preserving natural resources.

Fight Global Warming – By repurposing plastic waste, we contribute to a cleaner environment while enhancing construction and architecture.

Save Trees – Our wood-textured surfaces offer a natural look without harming forests. At Alutech, we go beyond expectations, delivering excellence in every panel!

VISION MISSION VALUES

ACP (ALUMINIUM COMPOSITE PANEL)

Aluminum Composite Panels (ACPs), often referred to simply as ACPs, represent the epitome of cutting-edge construction materials. These panels seamlessly unite two aluminium sheets with meticulous precision, creating a versatile solution ideal for modern cladding needs. Available in thicknesses ranging from 3 to 6 MM, ACPs offer exceptional durability and aesthetic versatility. Distinguished by their metal-based composition, ACPs embody lightweight elegance, eco-conscious design, and formidable resistance to weather and termite challenges. With exceptional UV resistance and a wide spectrum of colours and patterns, they cater to diverse designaspirations. Their low-maintenance profile, complete recyclability, and impeccable dimensional stability position ACPs as the preeminent choice for architectural endeavours that demand distinction and excellence.

HPL (HIGH-PRESSURE LAMINATE)

Elevate your exterior aesthetics with High-Pressure Laminate (HPL), the pinnacle of durability and innovation. Noted for its exceptional resistance to chemicals, fire, and water, HPL is the outcome of unwavering dedication to research and development. Introducing our groundbreaking Metal-Based HPLs, 6 MM in thickness, designed to conquer India's unpredictable climate. These pioneering solutions, renowned for their unmatched mechanical strength, have become the preferred choice across diverse sectors, setting new standards for versatility and reliability in various applications.

OUR PREMIUM OFFERINGS:

A GRADE

A- Grade consists of A1 and A2 material which are non-combustible.
Owing to its 90% mineral content, completely stops Fire from spreading.
A2 releases negligible heat, no smoke and produces zero flaming droplets.

B1 GRADE

B1 materials are fire-retardant materials with low flammability. It is designed in a manner that it prevents rapid escalation of fire. It contibute only a light amount of heat during combustion with little smoke.

B2 GRADE

B2 materials are averagely falmmable fire- retardants, with nearly 70% of mineral content. It is combustible but also prevents fire escalation contributing to heat and smoke during combustion.

INDEX PAGE

C O N T E N T

01
EXOTIC COLLECTION
An exotic collection of ACP panel shades can transform a structure from mundane to magnificent. These shades offer a range of visual experienc-es, creating unique and unforgettable facades and interiors.

02
VINTAGE COLLECTION
Pair vintage shades with classic finishes like solid, matte, or even textured finishes like wood or stone effects.

03
NATURAL STONE COLLECTION
They capture the unique textures of natural stone, from the smooth surfaces of marble to the rougher finishes of some sedimentary rocks.

04
3D LOUVERS COLLECTION
ACP louvers are available in a diverse range of colors, finishes, and textures to complement various architectural styles and design preferences.

05
NATURAL WOOD COLLECTION
These panels feature wood-like finishes or grain patterns on the outer aluminum sheets, replicating the natural beauty and warmth of various wood species.

06
MARBLE COLLECTION
A more affordable option compared to natural marble, both in terms of material and installation costs.

07
SAND COLLECTION
Sand collection ACP panels come in a range of colors that draw inspiration from various sandy landscapes like beaches, deserts, and mountains.

08
SPARKLE, MIRROR & BRUSH COLLECTION
Sparkle solid color ACP panels offer aesthetic appeal with a vibrant, lively finish, combined with practical benefits like water and UV resistance, fireproofing, and ease of installation.

09
HIGH GLOSS DAZZLING METALLIC
High gloss metallic finishes provide a luxurious, sophisticated, and modern look that elevates the aesthetic of any building or interior.

10
SOBER SOLID COLOR COLLECTION
These shades provide a contemporary, sleek, and sophisticated look, perfect for modern architecture. They can be paired with vibrant accents for a striking contrast.

Our Esteemed clients

Brand USP (Unique Selling Proposition)

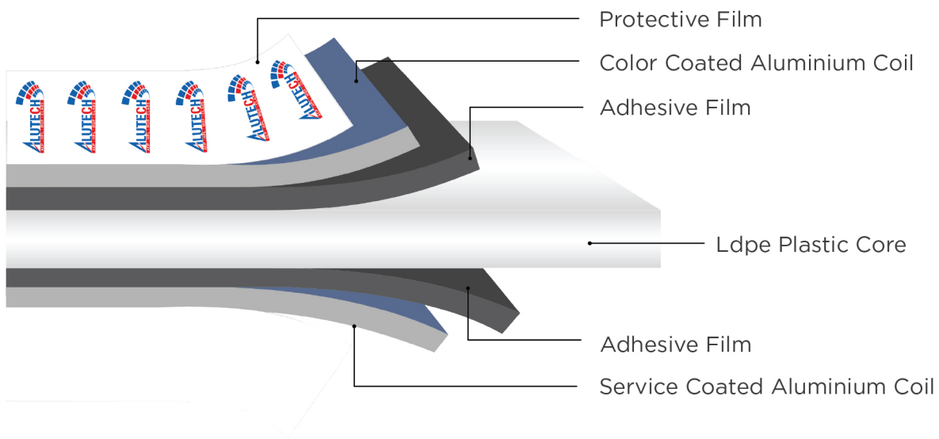

Alutech India stands as a symbol of innovation, quality and design excellence in the world of architectural surface solutions. With years of manufacturing expertise and a passion for perfection, we deliver products that combine aesthetic appeal, superior durability and cutting-edge technology.

Our USP lies in offering a complete range of surface materials from ACP, HPL, MDF to Cladding Solutions all crafted under one brand, ensuring consistency, quality and design harmony across every space. Backed by state-of-the-art manufacturing facilities, rigorous quality control, and a nationwide dealer network, Alutech ensures reliability and satisfaction at every step.

The entire panel consists of following layers:

- Top Aluminium Foil
- Low Density Polythebe Core
- Bottom Aluminium Foil
- The top Aluminium Sheet is coated with either Polyester or PVDF Paint
- The Core is either Low Density Polythene or a FR (Fire Retardant) core which is specially treated for fire resistance.
- The bottom Aluminium Coil comes with anti corrosive primer coating (6-8 micron) or back side paint (white or light grey color)

Special Remarks :

Batch Consistency:
Please note that slight color variations may occur between different production batches. For color consistancy please place the complete project order at once.

Visual Disclaimer:
All images are for illustrative purposes only; the final product may differ in appearance.

Inquiries:
For further information, please reach out to an authorized Alutech dealer or company's sales executive.

Custom Dimensions:
Standard lengths can be customized to meet your exact specifications.

Variation Possibility:
These shades are provided for reference only; the actual supply shades may vary from batch-to-batch.

Width Options:
While we provide 4-feet material as standard, we can also supply 5-feet widths to meet your specific project needs.

Structural Integrity:
We provide 6mm HPL panels, engineered for superior strength and impact resistance.
