ARTGLO

ABOUT US

Artglo offers a formidable range of innovative and decorative building materials designed to meet the evolving needs of modern architecture and construction.

ALCLAD NEO LOUVERS

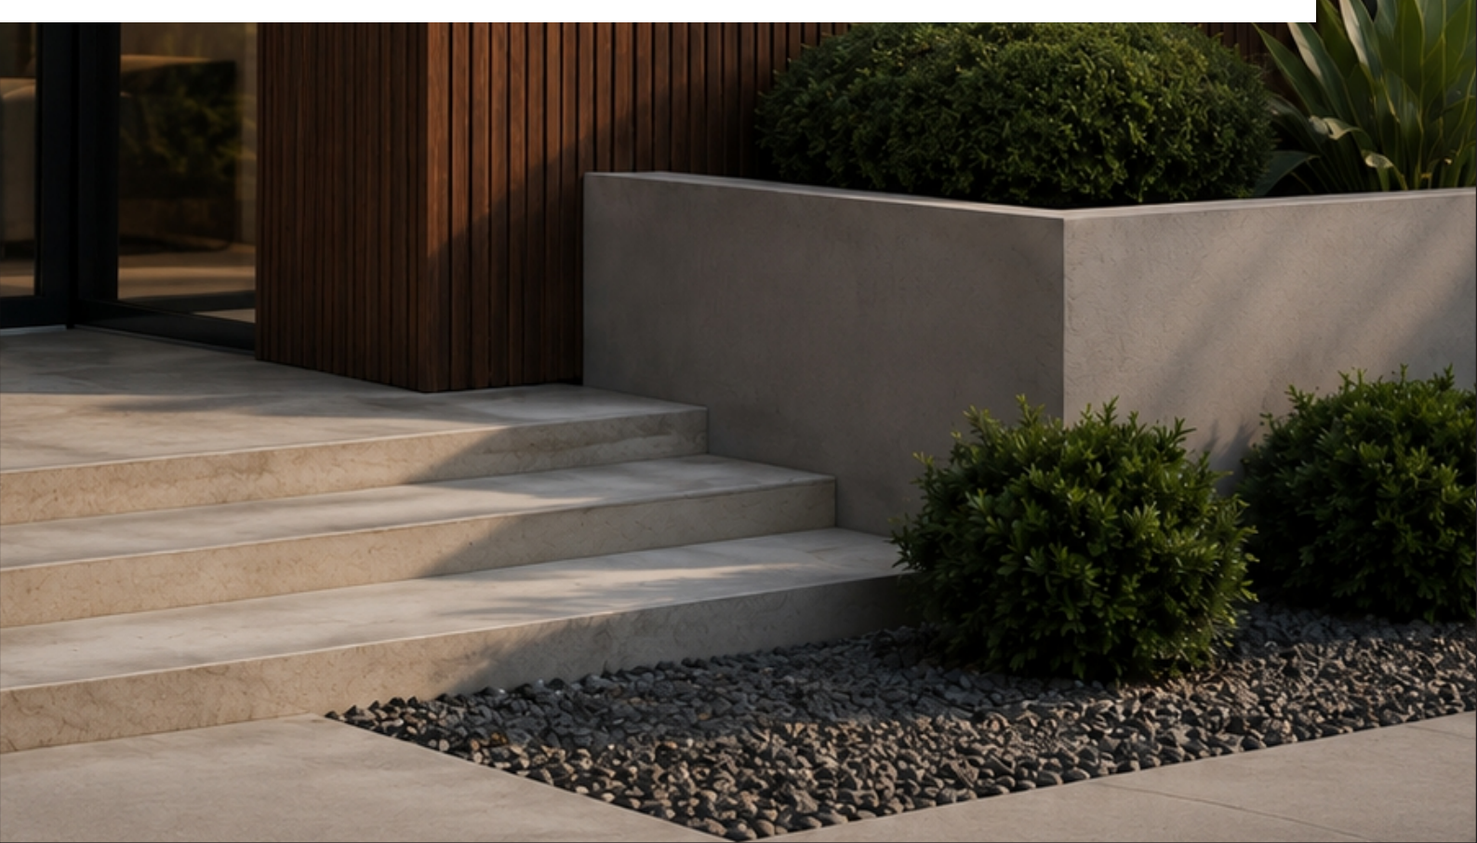
Alclad Neo Louvers offer the perfect combination of modern aesthetics, durability, and functionality, making them an ideal choice for contemporary architectural and Exterior design applications.

Available in Twelve distinctive designs, each louver is thoughtfully crafted to enhance the visual appeal of any space. With an exclusive selection of elegant colors and finishes, Alclad Neo Louvers not only deliver lasting performance but also add a refined touch of style and sophistication to exteriors.

Whether you want to create a sleek contemporary look or a warm, classic ambience, Alclad Neo Louvers provide versatile design solutions to complement a wide range of architectural styles and preferences.

APPLICATIONS

- Canopy
- Gate Paneling
- Exterior Cladding
- Roof Cladding
- Fence & Railing
- Exterior - Highlighter, Panels
- Balcony Cladding



ALCLAD NEO

100% REINFORCED CORE

100% reinforced thermo polymer base makes it significantly superior in strength & rigidity like aluminium compared to other cladding materials such as WPC & PVC and ACP louvers which are hollow

NATURAL WOOD FINISH

ALCLAD is finished with a high durable exterior grade pvdf coating on top. It makes it impervious to uv rays and harsh weather while giving natural sand and wooden finish.

DEVELOPED IN JAPAN

It is made using very advanced japanese technology which makes it a premier product for exterior, handling any weather.

PVDF COATING

DEMENSIONS

NEO AN SERIES

- Core: Thermopolymer Cladding
- Finish: Exterior grade PVDF Coating
- Height: 9.5 ft (2900 mm)
- Width: 6.9 inches (175 mm)
- Thickness: 15 mm
- Sq ft coverage per panel: 5.45 sqft
- Effective coverage: 4.74 sqft

NEO AE SERIES

- Core: Thermopolymer Cladding
- Finish: Exterior grade PVDF Coating
- Height: 9.5 ft (2900 mm)
- Width: 7.9 inches (200 mm)
- Thickness: 20 mm
- Sq ft coverage per panel: 6.23 sqft
- Effective coverage: 5.45 sqft

NEO AO SERIES

- Core: Thermopolymer Cladding
- Finish: Exterior grade PVDF Coating
- Height: 9.5 ft (2900 mm)
- Width: 4.52 inches (200 mm)
- Thickness: 16 mm
- Sq ft coverage per panel: 3.6 sqft
- Effective coverage: 3.1 sqft

ACCESORIES

JOINTER PROFILE

It is used to join two panels securely while providing a clean and seamless finish

L CORNER

used for protecting and finishing exposed edges after the product is installed

END PROFILE

used for finishing the open ends of the installed panel system
